Reasons For Allowance

Claims 1 – 17 are allowable.

1. The following is an examiner's statement of reasons for allowance: in combination with other limitations of the claims the prior arts made of record fail to suggest an input/output controller connected to a control module and a terminal (an extension unit for a programmable logic controller) that comprises a mode-selecting circuit including a plurality of preset operation modes which determine an input or output of a first port and a second port, data-transmitting formats used by the first and second port and data-saving formats used in a memory.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
3. Brooks et al. (US patent Number 6,384,753) discloses a high-density analog interface.
4. Webster et al. (US patent Number 6,448,920) discloses a system and method for converting analog values to and from real world values.
5. Breinlinger (US Patent Number 6,744,393) discloses a low cost multi-range input circuit for industrial analog input modules.
